# Project Design Phase-II Technology Stack (Architecture & Stack)

| Date          | 24 October 2022   |  |
|---------------|---|--|
| Team ID       | PNT2022TMID44624  |  |
| Project Name  | Signs With Smart Connectivity for Better Road<br>Safety |  |
| Maximum Marks | 4 Marks   |  |

#### **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table2

#### **GUIDELINES:**

- To replace the static signboards, smart connected sign boards are used.
- These smart connected sign boards get the speed limitations from a web app using weather API and update automatically.
- Based on the weather changes the speed may increase or decrease.
- Based on the traffic and fatal situations the diversion signs are displayed.
- Guide(Schools), Warning and Service(Hospitals, Restaurant) signs are also displayed accordingly.
- Different modes of operations can be selected with the help of buttons.

### **Table-1: Components & Technologies:**

| S.No | Component           | Description   | Technology   |
|------|---------------------|---|--|
| 1.   | User Interface      | How user interacts with application e.g. Web UI, Mobile App, Chatbot etc. | HTML, CSS, JavaScript / Angular Js / React Js etc. |
| 2.   | Application Logic-1 | Logic for a process in the application                                    | Java / Python                                      |
| 3.   | Application Logic-2 | Logic for a process in the application                                    | IBM Watson STT service                             |
| 4.   | Application Logic-3 | Logic for a process in the application                                    | IBM Watson Assistant                               |
| 5.   | Database            | Data Type, Configurations etc.  | MySQL, NoSQL, etc.                                 |

| 6. | Cloud Database | Database Service on Cloud                       | IBM DB2, IBM Cloudant etc.  |
|----|----------------|---|---|
| 7. | File Storage   | File storage requirements                       | IBM Block Storage or Other Storage<br>Service or Local Filesystem |
| 8. | External API-1 | Purpose of External API used in the application | IBM Weather API, etc.   |

## **Table-2: Application Characteristics:**

| S. | Characteristics | Description   | Technology      |
|----|-----------------|---|-----------------|
| No |                 |   |                 |
| 1. | Security        | Strong security system that   | Firewall,       |
|    | Implementations | anyone without login credentials  | Firebase, cyber |
|    |                 | and hackers are not allowed to  | resiliency      |
|    |                 | enter the network.  | strategy        |
| 2. | Scalable        | Easy to expand the operating range  | IoT, internet.  |
|    | Architecture    | by increasing the bandwidth of the network.   |                 |
| 3. | Availability    | Available anytime and everywhere 24/7 as long as the user is signed into the network. | IBM Cloud       |
| 4. | Performance     | Supports a large number of users to access the technology simultaneously.             | IBM cloud       |
